Dear Josh,

Thank you for the stock of W-1305. Any further derivatives we make of it we will send you.

Don't worry about the "private stocks"--Myers and I had a further conference and found we can get along nicely with 1305. We will use it for SRP work, mostly. Thanks also for the interesting account of the latest findings on the elimination of Mal-S. I'll look forward to reading the full account. Be sure to keep me on your reprint mailing-list!

Very best regards,

E. A. Adelberg
